I am a Software Engineer with expertise in both front-end and back-end development, I am committed to continuous learning and growth. Passionate about keeping up with the latest trends and technology, constantly seeking new challenges and opportunities to expand my skills and knowledge. Actively seek out feedback and insights from those around me to stay informed and drive innovation in my work.

Skills

Languages - JavaScript, HTML, CSS, Python, C#, C++, SQL, Mongo, JSON | **Libraries and Frameworks** - React, Express.js, Django, JQuery, Bootstrap, .NET | **Database** - PostgreSQL, MongoDB | **Other** - RESTful Routing, JSON api | **Interpersonal Skills** - Highly collaborative, strategic problem solver, strong written and verbal communicator

Projects

DBD-Datalog | Back End Application [Mo-project-2](#) 03/2023

A Datalog for "Dead by Daylight" characters that logs base game characters as well as new DLC characters

- Utilized **Javascript, Express, Bulma**, and **MongoDB** to create an interactive site for users
- Created Basic Crud app with rest routes for viewing and action routes for interaction
- App that allows users to interact with the site by adding, deleting, and editing data on the page

Social Media Site | Full Stack Application ([project_3-frontend](#)/[Project_3_Backend](#)) 04/2023

- **MongoDB, Express, React, Node**
- Created an api with the backend server using relational models, and used react to create an interactive experience for users as well
- Partnered with a fellow developer to create a mobile app prototype, leveraging each other's strengths to deliver a polished and user-friendly product.

CookBook | Full Stack Application ([CookBook_Front](#)/[CookBook_Back](#)) 04/2023

- **Django, postgresql, react, python**
- Created an api utilizing **Django**, and **postgresql** and established user authentication
- **React** front end using **JSON** request to access backend for full app
- Collaborated with a team of developers to design and implement a web application using Agile methodologies, contributing to successful delivery of the project within tight deadlines.

CodeBreaker | Full Stack Application ([CapstoneFrontend](#)/[CapstoneBackend](#)) 05/2023

- **C#.net, react**
- Created a backend with api for storage and data capture
- **React** front end used to create the game functionality and logic

Professional Experience

Sales Associate, Footlocker | NY 08/2021-current

- Provide exceptional customer service to approximately 75 customers per shift, utilizing recommendations and approaches to meet their unique needs.

- Take initiative in identifying and resolving disorganization in the stock room and on the sales floor, demonstrating a strong attention to detail and a commitment to maintaining a high standard of cleanliness and organization.
- Utilize strong problem-solving skills to quickly identify and resolve any issues that arise, whether in relation to customer needs or store operations.

Education

Software Engineering Immersive Program

General Assembly | Remote

02/2023 - 04/2023

Full-stack software engineering immersive student in an intensive, twelve-week, 450+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies. Developed a portfolio of individual and group projects.
